About Skin Tech®

Medical Peelings

Cosmeceuticals

Results

**Skin Tech Pharma Group SL** is one of the first companies that, since 1996, offer to the market extremely effective skin rejuvenation products, under the brand **Skin Tech®**.

The range of Skin Tech® products is composed of 2 synergetic groups: **medical peelings**, dedicated to medical professionals (dermatologists, physicians and/or plastic surgeons), and **cosmeceuticals** that the patients apply, between and after peeling treatments to sustain and prolongate its effects.

**Easy TCA®** and **Easy TCA® Pain Control** are the famous and internationally known Skin Tech® chemical peelings for skin regeneration. Considered as the safest, the most effective and the easiest peeling with TCA (Trichloroacetic Acid), Easy TCA® can be applied for treating face and body (hands, forearms, back, decollete, belly, thigh, etc) and is used for fine lines, photo-aging, acne problems, pigment problems (hyperpigmentations), melasma, chloasma, keratoses, acne scars, lentigines, etc.

Skin Tech® Home Cares is a complete line of dermocosmetic creams, specifically formulated to help protecting the skin all along its regeneration process between and after peeling treatment. **Atrofillin®** is one of the latest Skin Tech®'s creations, unique cosmeceutical care with tetra-effects: antioxydant defense, skin tone homogenizing, skin tensing and volumizing. **Atrofillin®** not only refills the subcutaneous tissues, but also makes the appearance of skin tissues uniform and helps softening the appearance of liver spots. **Mamofillin** is a specific peptides content breast care. The hexapeptide of those creams is non-hormonal related molecule that helps differentiation of pre-adipocytes into adipocytes. This induces an increase of White Adipose Tissue (WAT) which consists the main volume of the breast, without any risk of cytotoxicity or mutagenic activity.

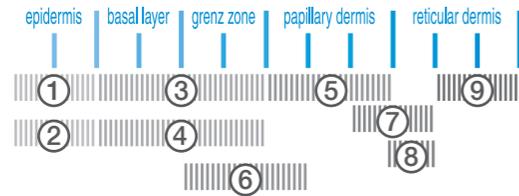

Today, the philosophy of Skin Tech® brand continues its evolution to supply the safest and most efficient medical peelings and outstanding cosmeceuticals. The products are manufactured according to European Directive 93/42/EEC on Medical devices, Regulation (EC) n°1223/2009 on cosmetic products, and following ISO 13485 and ISO 22716. We also have the certificate of compliance of good manufacturing practices (GMP) cosmetics.

Skin Tech® is a main actor operating in the field of aesthetic medicine, surgery and dermatology, proposing a unique concept of medical peelings together with special cosmeceuticals allowing predictable and reproducible results.

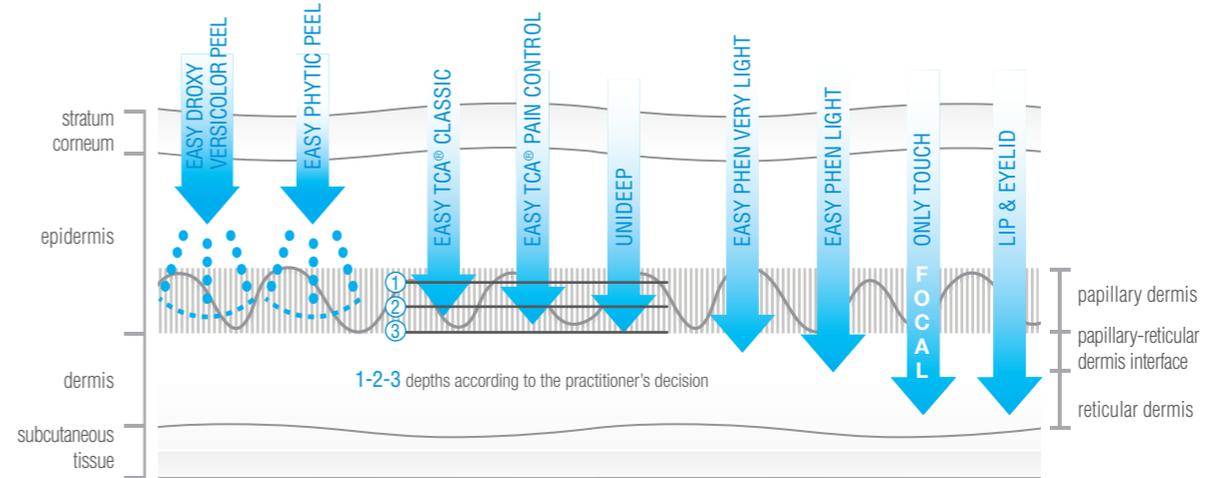

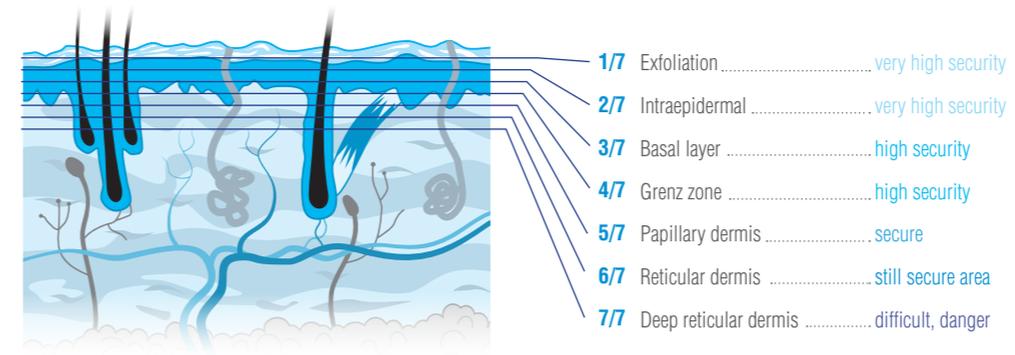

# Medical Peelings

Skin Tech® offers a wide range of peeling depths, from epidermal up to reticular dermis peels, effective, easy to use and particularly reliable. The results are predictable and reproducible, if the application protocol is respected.

- ① **Easy Droxy Versicolor Peel:** Epidermis
- ② **Easy Phytic Peel:** Epidermis
- ③ **Easy TCA® Classic:** Basal Layer - Grenz Zone
- ④ **Easy TCA® Pain Control:** Basal Layer - Grenz Zone
- ⑤ **Unideep:** Papillary Dermis
- ⑥ **Easy Phen Very Light:** Grenz Zone - Papillary Dermis
- ⑦ **Easy Phen Light:** Interface Papillary Dermis - Reticular Dermis
- ⑧ **Only Touch:** Focal Reticular Dermis
- ⑨ **Lip & Eyelid:** Deep Reticular Dermis

## IDEAL AND APPROPRIATE PEELING DEPTHS

NO MISTAKES IN NEUTRALIZATION

# Easy Droxy Versicolor Peel

Unique combined peel in thick liquid crystal gel - adapted for a total even application

Nº reg. AEMPS 584-PE

- Glycolic + Citric + Lactic + Kojic + Salicylic for a better efficacy together with a visual control of neutralization process in real time (Neutralizer Versicolor).
- Phototypes 1-6

### Indications:

Solution designed to obtain superficial peeling effect.

### Presentation:

- 1 phial - 15 mL Easy Droxy Versicolor Peel
- 1 tube - 50 mL Neutralizer Versicolor
- > 5 treatments for face

2/7

SLOW RELEASE ALPHA HYDROXY ACIDS

# Easy Phytic Peel

Self neutralizing (without neutralization)

- Glycolic + Lactic + Mandelic + Phytic acids
- No pre-peel conditioning
- No social downtime
- Phototypes 1-6

### Indications:

Solution designed to obtain superficial peeling effect.

### Presentation:

- 1 phial - 50 mL
- 25 treatments for face

2/7

Medical Peelings

SUPERFICIAL-MEDIUM ACTION

## TCA REFERENCE PEEL

# Easy TCA® Classic 4/12/24 treatments

Multi-indications · Easy to do · Maximum security

- Special peeling system: Base solution to be mixed with Aktivator TCA 50% for reconstituting a peeling solution of 15% TCA
- Short / partial social downtime
- Phototypes 1 to 6

### Indications:

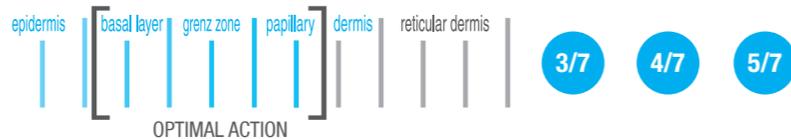

Photo aging and its consequences, acne and post-acne, pigmentation problems (melasma, chloasma, post-inflammatory hyperpigmentation), ichthyosis, keratoses and lentigine.

### Presentation:

4/12 ampoules - 2 mL of Base Solution  
1/3 tube - 10 mL of Post Peel Mask

### Presentation:

24 treatments  
2 phials - 14 mL of Base Solution  
1 phial - 3,4 / 10 / 10 mL of Aktivator TCA  
1 tube - 50 mL of Post Peel Mask

CE 1014  
Class IIa Medical device

## LESS PAIN, MORE GAIN

# Easy TCA® Pain Control 4/24 treatments

Maximum comfort for the patient

A new patented technology allows EASY TCA® PAIN CONTROL to reduce pain sensation usual for a TCA application. Especially in case of photoaging and melasma. Phototypes 1 to 6.

### Indications:

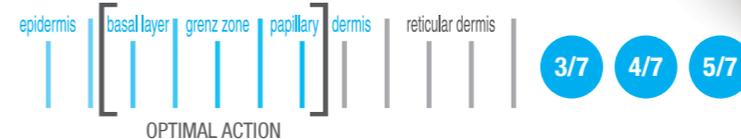

Photo aging and its consequences, acne and post-acne, pigmentation problems (melasma, chloasma, post-inflammatory hyperpigmentation), ichthyosis, keratoses and lentigine.

### Presentation:

4 treatments  
1 phial - 8 mL of Pain Control Base Solution  
1 phial - 3,4 mL of Aktivator TCA® 50%  
1 tube - 10 mL Post Peel Mask

### Presentation:

24 treatments  
2 phials - 25ml of Pain Control Base Solution  
1 phial - 20 mL of Aktivator TCA® 50%  
1 tube - 50 mL Post Peel Mask

CE 1014  
Patented  
Class IIa Medical device

## DERMO-EPIDERMAL REGENERATION

# Unideep

Flexible treatment

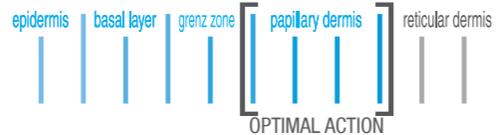

- 25% TCA
- Pink-white uniform frost + sliding= Papillary Dermis
- Down time: 6-7 days
- Phototypes 1 to 3 (Phototypes 4-5: prepeel conditioning for 3 weeks)

### Indications:

Photo aging and its consequences, acne scars, pigmentation problems (melasma, chloasma, post inflammatory hiperpigmentation), freckles, wrinkles, keratosis and lentigines.

### Presentation:

- 1 phial - 4 mL of Base Solution
- 1 phial - 3,2 mL Aktivator TCA® 50%
- 2 tubes - 10 mL of Post Peel Mask

CE  
1014

Class IIa Medical device

## FOCAL & UNIQUE

# Only Touch

For hands & forearms & decollete

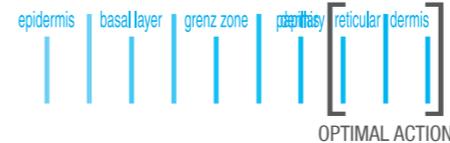

- 43% TCA focal peel
- White-grey focal frost (diameter <1 cm)
- Phototypes 1 to 4

### Indications:

Treatment of keratosis and lentigines of the hands, forearms and decollete: focal application of a maximum diameter of 1 cm. Only Touch is a complementary peeling, only recommended together with Easy TCA® or Easy TCA® Pain Control Peel

### Presentation:

- 1 phial - 5 mL of Base Solution
- 1 phial - 3,8 mL Aktivator TCA® 80%
- For +/- 25 focal applications

CE  
1014

Not on the face  
Not for treating melasma/chloasma

Class IIa Medical device

Medical Peelings

MEDIUM - DEEP ACTION

BEST FOR EARLY PHOTO-AGING

# Easy Phen Very Light

Skin remodelling with lifting effect

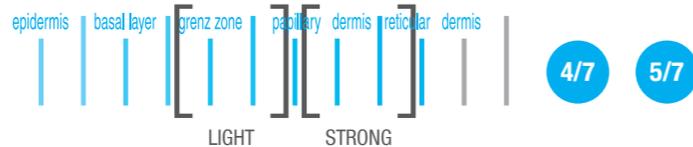

- Hybrid peel: 15% Phenol + 8% TCA + 0,5% Croton Oil
- Minimum down time: 5-7 days
- Phototypes 1-4

### Indications:

Intended for the treatment of photo-aging and its consequences.

### Presentation:

- 1 phial - 3 mL Easy Phen Very Light solution
  - 1 tube - 10 mL of Post Peel Mask
  - 1 sachet - 5 g of Bismuth Subgallate Powder (Yellskreen - CE Class I)
- For 1 treatment

CE 1014  
Class IIa Medical device

DEEP PEEL

# Easy Phen Light

Strong skin rejuvenation

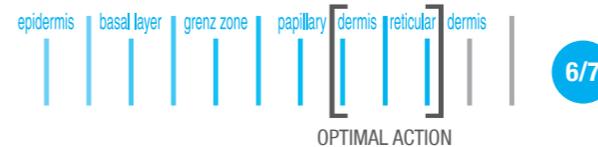

- Hybrid peel: 30% Phenol + 12% TCA + 0,5% Croton Oil
- Down time: 6-10 days
- Phototypes 1-4

### Indications:

This peel is intended for the treatment of photoaging and its consequences, including the treatment of lesions such as actinic keratosis and premalignant lesions.

### Presentation:

- 1 phial - 3 mL Easy Phen Light solution
  - 1 tube- 10 ml of Post Peel Mask
  - 2 sachet - 5 g of Bismuth Subgallate Powder (Yellskreen - CE Class I)
- For 1 full face treatment

CE 1014  
Class IIa Medical device

## TRI-DIMENSIONAL LIFTING

# Lip & Eyelid

Optimal and long lasting results

- Exclusive peel formulation: 60% Phenol +1% Croton Oil
- Down time: 8-12 days
- Prototypes 1-4

### Indications:

For photoaging and its consequences, including the treatment of lesions such as actinic keratosis and premalignant lesions.

### Presentation:

- 1 phial - 3 mL Lip & Eyelid solution
  - 1 tube - 10 ml of Post Peel Mask
  - 1 sachet - 20g of Bismuth Subgallate Powder (Yellskreen - CE Class I)
  - 1 occlusive tape (Leukoflex - CE-Class I)
- For 15 local treatments around eyes or lips, or for 1 full face treatment

EXCLUSIVE

OPTIMIZED RESULTS WITH

# Cosmeceuticals

Skin Tech® daily creams are specially developed for pre and post-peel care for all skin conditions

**Mamofillin Cream / Milk**  
Special breast care with volumizing effect.

## Protective

## Active

## Specific

**IPLase Mask®**  
Post treatment cream.  
Daily protection for skin subjected to all types of aggressive laser treatment and medium-deep peeling.

**Melablock-HSP® SPF 30, 50+**  
Sun protection 4 in 1 (physical/chemical sunscreens + erythema protection + antioxidant + HSP activation).

**Vit. E Anti-oxidant**  
Moisturizing and anti-oxidant cream for sensitive skin. Highly recommended to use after peeling.

**Actilift®**  
Cream with immediately visible DMAE lifting effect.

**Atrofillin®**  
Global anti-age complex. Clarifies and evens the skin. Improves dermal thickness quality.

**Nutritive Cream**  
**Vit A-C-E Lipoic Complex**  
Moisturizing, anti-aging super anti-oxidant cream (post peel, post laser, smokers' skin, etc).

**DHEA-Phyto**  
Effective restoration for mature skin.

**Purifying Cream**  
For skins with acneic tendency. Before and between peelings.

**Purigel**  
Non-oily gel for acne-prone skin. Long term daily treatment.

**Blending Bleaching Cream**  
Best option against pigmentation disorders.

**Cleanser**  
Physiologic pH foam with exclusive cleaning properties.

# CLEANSING FOAM WITH PHYSIOLOGICAL pH Cleanser

For any skin type · Dermatologically tested

## Active ingredients:

- Sodium Lauroyl Oat Aminoacids
- Disodium Lauroamphodiacetate
- Sodium Trideceth Sulfate
- Lactic Acid
- Glycerin

## Indications and actions:

Restores the physiological skin pH.  
Gentle elimination of impurities accumulated on the skin.  
Well tolerated by skins that have become sensitive following dermatological treatments.  
Does not modify skin permeability.  
Specially suitable before and after aesthetic treatments.

## Presentation:

Bottle - 150 mL

GENTLE  
CLEANSING

# FOR DRY AND SENSITIVE SKIN Vit. E Anti-oxydant

Moisturizing · Anti-oxidant

SENSITIVE  
SKIN  
HYDRATION

## Active ingredients:

- Tocopheryl Acetate
- Glycyrrhetic Acid
- Biosaccharides
- Urea
- Dextrin
- Alanine
- Glutamic Acid
- Aspartic Acid
- Ceramide-3
- NMF (Natural Moisturizing Factor)

## Indications and actions:

Daily moisturizing for hypersensitive skin. Very fluid texture.  
Immediate and durable moisturizing and anti free radical action after peeling, abrasions or lasers treatment.  
Protects the skin from external aggressions.

Cosmeceuticals

CLEANSER / PROTECTIVE

ANTI THERMAL DEFENSE & QUICK RECOVER

IPLASE<sup>Mask</sup><sup>®</sup>

Post treatment cream

**Active ingredients:**

- SOD
- Ubiquinone
- Heat Shock Proteins (HSP) inducer
- Vitamins A, C, E, F, H
- Methionine
- Methylsilanol Mannuronate
- Urea
- Allantoin
- Vitis Vinifera Vine Extract
- Sh-polypeptide-1

**Indications and actions:**

Specially recommended after medium and deep peelings.  
Prevention of damages induced by therapies that cause inflammation or a significant increase in skin temperature (laser, intense pulsed light, UV radiation, thermogenic radio frequencies, radiotherapy, etc).

**Presentation:**

Tube - 50 mL

SKIN  
STRESS  
REDUCTION

SPECIAL PROTECTION: 4 in 1

Melablock HSP<sup>®</sup> SPF30 / SPF50+

Protection against UVA - UVB · Skin proteins protection

Protection against erythema · Anti free radicals

SUN  
PROTECTION  
HEAT SHOCK  
PROTEINS

**Active ingredients:**

- Physical sunscreen agents filter
- Chemical sunscreen agents filter
- Heat shock Proteins (HSP) inducer
- Antioxidants - antithermal stress

**Indications and actions:**

Activation of the natural synthesis of Heat Shock Proteins (HSP) which defends the skin against protein denaturation and thermal cell lysis which occur after an increase in temperature of just a few degrees. Sun block with micronised titanium dioxide combined with a blend of stable chemical sun filters. Protection against more than 98% of UVAs and UVBs. Daily protection specially designed for use after peelings, laser, pulsed light or demabrasion treatment. Strong antioxidant effect and erythema protection.

PROTECTIVE

SENSOR EFFECT + QUICK ACTION

# Actilift®

DMAE lifting

#### Active ingredients:

- DMAE
- Retinol in Cyclodextrines
- Tocopheryl Acetate
- Biosaccharide GUM-1
- Glycolic Acid
- Resveratrol®

#### Indications and actions:

Rapidly visible tensor effect.  
Improvement of the epidermal defences and dermal moisturizing.  
Inhibition and repair of collagen and elastine "cross linking" (visible tightening of the skin).  
Gradual durable action.

#### Presentation:

Tube - 50 mL

FIRMNESS  
EFFECT

FLASH REVITALIZING

# Nutritive Cream

Vit. A-C-E Lipoic Complex

Anti-aging · Multivitamins and anti-oxidant

DAMAGED  
SKIN

#### Active ingredients:

- Retinol in Cyclodextrines
- Tocopheryl Acetate
- Ascorbic Acid in Cyclodextrines
- Ceramide-3
- Urea
- Glycyrrhetic Acid
- Phytic Acid
- Lipoic Acid

#### Indications and actions:

Prevention of skin aging and oxidative damage due to extrinsic factors. Revitalizing and moisturizing.  
Reduction of post-treatment time after aesthetic procedures.

#### Presentation:

Tube - 50 mL

Cosmeceuticals

ACTIVE

FOR MATURE SKIN

# DHEA-Phyto Cream

Effective restoration

#### Active ingredients:

- Discorea Villosa root extract
- Biosaccharide GUM-1
- Urea
- Aspartic Acid
- Glycyrrhetic Acid
- Dextrin
- Alanine
- Glutamic Acid
- Ceramide-3

#### Indications and actions:

Anti-aging for mature skin.  
Skin moisturizer and protection against free radicals.  
Skin balance improvement.

#### Presentation:

Tube - 50 mL

45+  
AND OVER

LIGHTENING

# Blending Bleaching Cream

Anti-oxidant · Anti-pigmentation

PIGMENT  
CONTROL

#### Active ingredients:

- Tyrosinase inhibitors complex (Morus Alba, Kojic Dipalmitate, Licorice extracts, Urea, Arbutin, Glabridine, Liquiritine, Mulberroside F)
- Tocopheryl Acetate
- Glycyrrhiza Glabra Root extract
- Retinyl Palmitate
- Allantoin

#### Indications and actions:

Prevention and/or treatment of hyperpigmentations.  
Also very efficient before and/or after laser treatments,  
peelings, dermabrasions and depilation.  
Reduction of skin oxidation and free radical activity,  
and help to keep skin smooth and fair.

PROTECTION AGAINST AGING SIGNS

# Atrofillin®

Skin volumizer · Lightening · Antioxidant · Lifting

DERMAL  
FILLING

### Active ingredients:

- Acetyl Hexapeptide-38
- Kojic Dipalmitate
- Aminoethylphosphinic Acid
- Morus Alba leaf extract
- DMAE

### Indications and actions:

Daily care cream, with skin volumizing properties, improving dermal thickness & quality. The specific combination of active ingredients helps to improve skin tone, increasing skin brightness and reducing symptoms of fragility or dryness. Atrofillin® shows hence multiple actions: it improves the epidermal tension, clarifies and evens the skin. Efficient antioxidant effect.

### Presentation:

Tube - 50 mL

# Mamofillin

Delicate breast care

BREAST  
DECOLLETE

### Active agents:

- Acetyl Hexapeptide-38
- Glycolic acid
- Emollients

### Indications and actions:

Cosmetic care for breast dermatologically tested with beautifying properties. The specific combination of active ingredients helps getting great results, improving skin elasticity and reducing symptoms of fragility or dryness. Use Mamofillin Milk in the morning, and Mamofillin Cream at night.
